IT SERVICES WORKFLOW

Service Request Intake

Receive service requests from users/customers via various channels

Investigation

The assigned support team or individual investigates the reported issue or fulfills the requested service.

Ticket Creation

Create a ticket in the IT service management (ITSM) system for each service request.

Resolution

Document the steps taken, changes made, and any additional information relevant to the ticket.

Initial Triage

Review the ticket to determine its priority and assign it to the appropriate support team or individual.

Ticket Closure

Update the ticket status to reflect the resolution or service completion.
